

Cabling  
solutions

DISCOVER  
**NEW  
PACKAGING**

[www.elematic.it](http://www.elematic.it)

As a producer of **cabling** and **fixing systems**, we are present in the market since 1977, becoming a leading company in our field. Able to anticipate the trends of the market with innovative spirit and a service constantly oriented to the needs of the customer, we have been achieving market share through our partners all over the world.

## PRODUCTS AND SOLUTIONS

We supply added-value products and innovative solutions to our customers. Our goal is:

- ▶ focused product range
- ▶ quality and certification
- ▶ innovation, research & development
- ▶ customer satisfaction
- ▶ service & flexibility

ITW (Illinois Tool Works) is a leading diversified manufacturing company, based in Glenview, Illinois (USA). ITW designs and manufactures highly engineered fasteners and components, equipment and consumable systems, and a high variety of specialty products and equipment for customers around the world.

## THE STRENGTH OF A BIG GROUP WITH A COMMON GOAL

Since 1998, Elematic belongs to ITW Group: service, innovation and technology.

**More than 100** years of history

**49.000** people

**57** countries around the world

**3** geography areas: North America, Asia-Pacific, Europe

# SYSTEM CERTIFICATIONS...

## QUALITY SYSTEM

ISO 9001:2008

The company is certified **ISO 9001:2008** for the design and manufacturing of cable ties and fixing systems with engineering polymers. Trading of fixing, cabling systems and electrical power tools. This certification guarantees that all the steps of our company processes, from development to delivery, are controlled following detailed procedures.

## ENVIRONMENTAL MANAGEMENT

ISO 14001:2004

Aware of the importance of our impact on the environment, we developed a certified environmental management system that leads us to reduce as much as possible this impact. All our Italian sites are certified according **ISO14001:2004** standard with the aim of design and manufacturing of cable ties and fixing systems through injection molding, design and manufacturing of our molds and, trading of cabling and fixing accessories.

# NEW LOOK!

DISCOVER THE NEWS

# NEW BRAND IMAGE UNIQUE AND STRONG

The new way to present our products,  
the new dress and packaging will give more visibility of our offer on the market.  
Our main objective is to support customers in their sale's activity  
to create a strong and understandable brand image.

## NEW PACKAGING, SAME QUALITY!

We guarantee  
the highest quality of our offer  
by the innovation of  
our company's processes.

## NEW COMPLETE LABELS, CLEAR AND EASY TO READ

Family products identification by colours.  
Clear technical information  
to choose the right products.  
Easy to read.

# A WIDE RANGE OF CABLE TIES

# HOW TO CHOOSE A CABLE TIE

## How to choose the right cable tie

The most important characteristics of a cable tie are:

- the raw material, for specific applications and environmental conditions (weather, chemicals and heat resistance, flammability rating);
- the tensile strength they can stand (tear strength);
- the min and max diameter they can bundle;
- the shape of the tie in case of particular applications.

## Resistance to chemical agents

- Chemical agents as powders, liquids or gases can deteriorate the raw material cable tie are made of: in this case, the mechanical properties of the cable tie, the performance of the product could not meet the required standards (see the table: Resistance to chemical agents).

## UV and weather resistance

All polymers, including the polyamides used for the production of cable ties, are sensitive to UV radiation. The most common additive used for protecting polyamides from UV radiation is carbon powder generally known as "carbon black".

**Natural cable ties (Elematic codes 52xx)** have low resistance to UV radiation and therefore are not suggested for outdoor applications.

**Black cable ties (Elematic codes 53xx)** are added with carbon black and they have a good weather and UV resistance; they are recommended for outdoor applications compared with the natural one. Test on black cable ties have showed an UV resistance of about 3 years in outdoor applications and to exposition to the typical environment of a South-European country.

**Weather Resistant Cable Ties (Elematic codes 53xx UV)** are made of a special added compound to provide an extra weather resistance so that they are suitable for outdoor applications. They are tested according to the norm CEI EN 62275 and the test method used, according to ISO 4892-2, simulates a condition equivalent to an exposition to solar radiance of at least 10 years in a region of South European Countries. The UV resistant cable ties meet all the tests defined by the norm and maintain, after the test conditions, the 100% of the declared tensile strength (type 2 classification - point 6.2.2 of the standard).

**Belturing Plus (Elematic codes 64xx)** are produced with materials resistant to UV rays and they are recommended for heavy-duty applications. In fact, as the UV resistant cable ties, these cable ties are tested according to the norm CEI EN 62275; Belturing Plus cable ties meet all the tests defined by the norm and maintain, after the test conditions, the 50 % of the declared tensile strength (type 1 classification - point 6.2.1 of the norm CEI EN 62275).

## Temperature resistance

All polymers, including polyamides used for the production of cable ties, are sensitive to high temperatures, becoming therefore fragile and sensitive to vibrations.

The max suggested installation temperature for standard cable ties is 60°C, while the max service temperature for continuous use is 85°C.

The min suggested installation temperature for standard cable ties in Polyamide 6.6 is -10°C, while the min service temperature for continuous use is -40°C.

**Heat Resistance cable ties (Elematic codes 53xx T)** are made of a specially added compound to provide an extra heat resistance (max service temperature for continuous use up to 125°C)

These cable ties are available in black and natural colour (the natural is more similar to aquamarine green colour due to the special polymer used).

**Belturing Plus (Elematic codes 64xx)** ensure a greater resistance in installations at low temperatures (up to a minimum temperature of -30 ° C).

**2-LOCK™ cable ties (Elematic codes 12xx and 13xx)** ensure an exceptional resistance in installations at low temperatures (up to a minimum temperature of -40 ° C)

## Tear resistance

Elematic cable ties are tested according International standard for cable ties CEI EN 62275. Strength tests are made at constant speed of 25mm/min and the maximum force declared is kept steady for 60 sec.

The standard conditions defined for the tensile test are referred to an ambient temperature of 23°C and a relative humidity of 50%.

It is important to underline that the values arising from those laboratory tests may not be representative of the resistance to the loads of real installations, due to the presence of external factors (high humidity, vibrations, high temperatures, etc.).

### General indications for cable ties installation (width 2,2 ÷ 4,8 mm)

Cable tie width (mm)	Tool setting (daN)
2,2	0<daN<3
2,5÷2,6	3<daN<6
3,5	6<daN<10
4,5÷4,8	10<daN<13

\*1 daN ≈ 1 Kg

For further technical information, please contact our technical department.

## Flammability rating

Fire resistance of polymers (also called flammability) is tested in laboratory on standard specimens with sizes  $125\pm5 \times 13\pm0.5$  mm and different thickness (0.8; 1.6; 3.2; 6 mm). The most used standard for this evaluation is the UL94 classification (Underwriters laboratories). These tests classify materials according to flame propagation speed on the specimen, to allow the auto-extinguishing of the flame and to the risk of flame propagation by drops. The lower rate is HB, that identifies a material with low combustion speed, then we find, in order, classes V2, V1 and V0, with a growing capacity of flame extinguishing.

Herewith please find a list of the categories of UL 94 classification:

**HB (Horizontal Burning) – Test description:** According the UL 94, the material is classified HB when the burn rate of the specimen with thickness 3,2 mm doesn't exceed the max speed of 38,1 mm/min and the specimen with minimum thickness doesn't exceed 63,5 mm/min.

**V0 – V1 – V2 (Vertical Burning):** in vertical tests same specimens as HB tests are used. Combustion time is measured, presence of drops or burning of the below cotton are registered and, according to UL 94, materials are classified as follow:

- V0 if the flame extinguishes within 10 seconds;
- V1 if the flame extinguishes within 30 seconds without drops;
- V2 if the flame extinguishes within 30 seconds with drops;

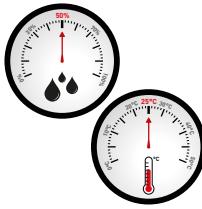

**Self-extinguishing cable ties (Elematic codes 52xx V0)** are made of a specially added compound and they can be used where the auto extinguishing performance is required (UL94-V0). They are available in milky white colour that depend on the physical characteristics of the material.

## Other materials

**Coloured cable ties (Elematic codes 52xx G-V-R-B)** are made with coloured masters without lead, chromium or cadmium; for this reason, the colour of the products might slightly change according to the moulding conditions.

**Detectable cable ties (Elematic codes 52xx DT)** are produced with copolymer material added with iron oxide, providing magnetic properties throughout, allow identification by metal detector or X-ray inspection equipment to meet food, beverage and pharmaceutical safety standard on reducing product contaminations. They are produced in blue colour for visual identification; product not suitable for food contact.

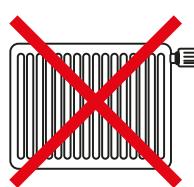

## Storage conditions of cable ties

For the correct conservation of the cable ties, it is recommended to store them at room temperature between 10 and 40 °C and relative humidity between 30% and 70%.

After opening the bag, use the cable ties as soon as possible; close the bag after use in order to maintain the correct humidity of the product.

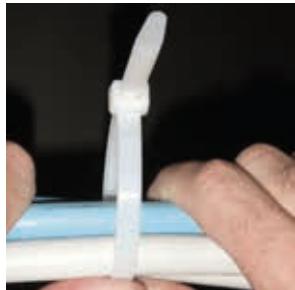

Avoid storing the product near heat sources, which could reduce the humidity of the cable ties decreasing their mechanical properties.

Do not store the cable ties in a sunny place: the direct action of UV rays can damage their structure, making them brittle and weak.

# HOW TO INSTALL AND USE A CABLE TIE

## Manual installation of standard cable ties

Insert the tip of the tie.

Tighten manually the tie till the complete fixing of the cables.

Avoid sharp bending of the tie: it will not improve the fixing strength.

Cut the exceeding part of the tie with the tool, leaving a few mm length as safety.

## Tool installation of standard cable ties

Set the max tension of the tool depending on the size of the tie.

Grip the cable tie with the tool.

Tighten the tie till the complete fixing of the cables.

Cut the exceeding part of the cable tie, properly adjusting the setting of the tool.

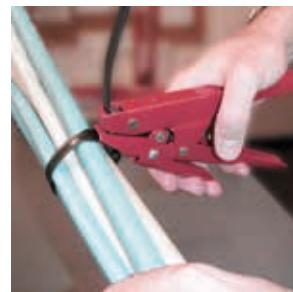

## Tool installation of belturing cable ties

Insert the tip of the tie and tighten a short segment.

Use the tool for tightening the tie around the cables.

Tighten the tie till the complete fixing.

Cut the exceeding part of the tie with the tool, leaving a few mm length as safety.

## Resistance to chemical agents of polyamide 6.6

Lead stearate	100	B
Carbon tetrachloride		B
Trichloroethylene (Trichloroethylene)		D

B = Good resistance without significant variations in weight and/or volume.

D = Discrete resistance with significant variations in weight and/or volume resulting from prolonged contact.

L= Limited resistance; it is possible to use the material in case of short contact.

P= Poor resistance; the material is strongly attacked.

S = Soluble.

## Technical characteristics of raw materials

Materials	Operating temperature	Flammability rating	Humidity absorption		Main characteristics
			23°C 50% U.R.*	Saturation	
Polyamide 6.6 standard	-40°C÷85°C	●	UL94-V2	2,7%	Polyamide 6.6 injection moulding grade. Good resistance to bases, oils, greases, fuel, oil derivate.
Polyamide 6.6 heat stabilized	-40°C÷125°C	●	UL94-V2	2,7%	Polyamide 6.6 heat-stabilized for heat stabilized 6.6 endurance applications to high temperatures.
Polyamide 6.6 UV stabilized	-40°C÷105°C	●	UL94-V2	2,7%	Polyamide 6.6 UV stabilized for improved weather resistance.
Polyamide 6.6 self-extinguishing V0	-40°C÷85°C	●	UL94-V0	2,7%	Polyamide 6.6 self-extinguishing (halogen-free).
Technopolymer (Belturing Plus)	-45°C÷85°C	●	UL94-HB	0,6%	Good resistance to UV rays and weather. Improved shock resistance. Reduced moisture absorption.
Polyethylene HD	-40°C÷100°C	○	UL94-HB	-	High-density polyethylene. Good shock resistance, to bases and weak acids.
Polyethylene LD	-50°C÷85°C	●	UL94-HB (nat, black) UL94-V2 (white)	-	Low-density polyethylene. Good shock resistance, to bases and weak acids.
Polyamide 6	-10°C÷65°C	●	UL94-HB	3%	Polyamide 6 injection moulding grade. Good resistance to bases, oils, greases, fuel, oil derivate.
Polypropylene	-10°C÷105°C	●	UL94-HB	-	Good resistance to high temperatures, bases and weak acids. Any absorption of humidity.
ABS	-10°C÷60°C	●	UL94-HB	0,3%	ABS injection moulding grade. Good mechanical resistance, to bases and weak acids, oils and greases. Good resistance to seawater and corrosive atmosphere. Any absorption of humidity.
PVC (rigid)	-10°C÷70°C	○	UL94-V0	-	Low resistance to acids and solvents. Good aging resistance. No moisture absorption.
PVC (flexible)	-40°C÷70°C	●	UL94-V1	-	Low resistance to acids and solvents. Good aging resistance. No moisture absorption.
Polycarbonate	-5°C÷85°C	○	UL94-V0	-	Low resistance to chemical agents. Good UV resistance.

\*U.R. = relative humidity

# CERTIFICATIONS

## Products' type approvals through International Approval Societies

### UL - FILE E86244

Elematic cable ties are recognized by UL (Underwriters Laboratories Inc.) following the norm UL 62275 - Cable Management Systems - Cable Ties for Electrical Installation.

### DNV - FILE E-11541

DNV certification guarantees that Elematic cable ties comply the "Det Norske Veritas" standards for the fixing of cables in the naval constructions and offshore, for indoor and outdoor installations.

### DNV-GL - FILE TAE0000000G

DNV-GL certification guarantees that Elematic cable ties comply the "Det Norske Veritas" and "Germanischer Lloyd" standards for the fixing of cables in the naval constructions and offshore, for indoor and outdoor installations.

Lloyd's Register  
Marine

### LLOYD'S REGISTER - CERTIFICATE N° 09/00025(E1)

The English Lloyd's Register Homologation certifies the mechanical properties and the flame resistance of Elematic cable ties in the shipbuilding and offshore applications.

### BUREAU VERITAS - CERTIFICATE N° 13190/C0 BV

This homologation, according to IEC 60092-IEC 62275 normative, assures that Elematic cable ties are made in accordance to "Bureau Veritas" standards for the fixing cables in shipbuilding.

### GL GERMANISCHER LLOYD CERTIFICATE N° 99 332 - 97 HH

Certifies the mechanical properties and the flame resistance of Elematic cable ties for applications on maritime and energy sector.

### R.I.N.A. CERTIFICATE N° ELE040812CS

Italian Naval Register Homologation following the norm IEC EN 60092-101 "Electrical Installations in Ship" for the flame test in shipbuilding and offshore applications.

## Self declarations

### CE Marking

Elematic certifies the conformity of its cable ties to the norm L.V. 2006/95/EC.

### CEI EN 62275

Elematic cable ties are internally tested following the European Norm "Cable ties for Electrical Installation". The results are in accordance with the requirements of the regulation.

### WEEE - ELV - REACH (REGULATION EC 1907/2006)

Materials used for Elematic cable ties & accessories are compliant to European directives regarding WEEE (waste of Electrical and Electronic Equipment - 2012/19/UE), ELV (life vehicles - 2000/53/CE), REACh (the materials used for the production of our articles do not contain the substances listed in the "Candidate List of Authorization" or in the attachment XIV of the EC 1906/2007).

## Quality system

### ISO 9001:2008

The company is certified ISO 9001:2008 for the design and manufacturing of cable ties and fixing systems with engineering polymers and trading of fixing and cabling accessories. This certification guarantees that all the steps of our company processes, from development to delivery, are controlled following detailed procedures.

### ISO 14001:2004

Aware of the importance of our impact on the environment, we developed a certified environmental management system that leads us to reduce as much as possible this impact. All our Italian sites are certified according ISO14001:2004 standard with the aim of design and manufacturing of cable ties and fixing systems through injection molding, design and manufacturing of our molds and, trading of cabling and fixing accessories.

**2-LOCK™**

# DOUBLE TOOTH PERFECT GRIP!

THE BEST PERFORMANCE WITH A CABLE TIE WITH **DOUBLE METAL TOOTH**.  
THE HIGHEST TENSILE STRENGTH AT THE LOWEST TEMPERATURES.

The innovative locking system with over-molded stainless steel cage grants superior mechanical performances than any other cable tie on the market; **2-LOCK™** combine the highest tensile resistance with the lowest effort of insertion, redefining new higher

performance standards. Mechanical excellence, easy to use, very low installation temperature, maximum reliability, innovative packaging, all that make **2-LOCK™** the new reference on the market for polyamide cable ties.

**E**  
**ELEMATIC®**

CABLE TIES // 2-LOCK™ //

# 2-LOCK™ CABLE TIES

**NEW****PATENTED**

2-LOCK™ cable ties have an innovative locking system (patented) based on an over-moulded stainless steel cage with double tooth which ensures mechanical performance superior to any other cable tie on the market.

The double tooth acts on the cable tie body in a symmetrical way, allowing an higher tensile strength value compared to the cable ties with single steel tooth.

The body of 2-LOCK™ cable tie is perfectly smooth from both sides; this helps to contain the insertion force which is lower than the competitors one and therefore facilitates the application. The absence of the rack on the body allows the "continuous closing adjustment" typical of this products ensuring a correct tensioning for each possible clamping diameter. The black cable ties are added with carbon black that gives an UV resistance for outside applications.

#### TECHNICAL DATA

Raw material:

polyamide 6.6 with double stainless steel 316 tooth (cage).

Halogen-free.

2,7% (50% relative humidity).

Humidity absorption:

-40°C ÷ 85°C.

Working temperature:

-40°C ÷ 60°C.

Installation temperature:

UL 94 class V2.

Flammability rating:

UV resistance (black colour), excellent resistance to aromatic solvents, oils, greases, petroleum products, high resistance to corrosion (stainless steel 316), good resistance to bases, limited resistance to acids; not resistant to phenols and to chloride solvents.

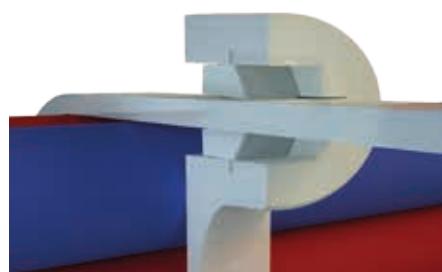

Resistance to external agents:

#### APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.

**HALOGEN FREE**

#### APPLICATIONS

- ▶ Electrical installations.
- ▶ Industrial wiring.
- ▶ Automotive.
- ▶ Panel building.
- ▶ Special applications.

#### BENEFITS

- ▶ Exclusive product (patented).
- ▶ Higher mechanical performances.
- ▶ Low insertion effort.
- ▶ Minimum installation temperature (-40°C).
- ▶ Rounded edges for the safest application.
- ▶ Resealable and recyclable bag.

#### LINKED PRODUCTS:

Tools for cable ties, see pages 80

\* The nominal dimensions can slightly change according to utilized mould.

\*\* not DNV-GL certified.

The new resealable bag with seal of "first opening" and euro hole for display avoids the dispersion of the product after the first opening and allows the optimal preservation of the product inside so that the cable ties will keep unchanged the initial mechanical characteristics. The bag is completely recyclable; the label is made of plastic material so there is no need to detach from the bag to recycle it.

The bag is completely recyclable; the label is made of plastic material so there is no need to detach from the bag to recycle it.

CABLE TIES // STANDARD //

# STANDARD CABLE TIES

The standard cable ties are produced exclusively in Polyamide 6.6 to avoid problems with separation of material (e.g., metals) during recycling or interference with electronic equipment.

The black cable ties are added with carbon black that gives an UV resistance for outside applications.

## TECHNICAL DATA

- ▶ Panel building.

## BENEFITS

- ▶ Bent rounded tip for an easier insertion through the head of the cable ties.
- ▶ Rounded edges for the safest application.
- ▶ Low friction coefficient of the material.

CABLE TIES // SPECIALS //

# UV RESISTANT CABLE TIES

These cable ties are made in polyamide 6.6 with special additives that assures an extra resistance to UV rays; they are tested according to the norm CEI EN 62275 and the test method used, according to ISO 4892-2, simulates a condition equivalent to an exposition to solar radiance of at least 10 years in a region of South European Countries. The UV and weather resistant cable ties meet all the tests defined by the norm and maintain, after the test conditions, the 100% of the declared tensile strength (type 2 classification - point 6.2.2 of the standard).

## TECHNICAL DATA

Raw material:	polyamide 6.6.
Halogen-free	
Humidity absorption:	2,7% (50% relative humidity).
Working temperature:	-40°C ÷ 105°C.
Installation temperature:	-10°C ÷ 60°C.
Flammability rating:	UL 94 class V2.
Resistance to external agents:	high UV resistance (DNV certification), excellent resistance to aromatic solvents, oils, greases, petroleum products, good resistance to bases, limited resistance to acids; not resistant to phenols and to chloride solvents.

## APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.

## APPLICATIONS

- ▶ Photovoltaic installations.
- ▶ Outdoor installations.
- ▶ Industrial wiring.

## BENEFITS

- ▶ Excellent resistance to UV rays.
- ▶ Bent rounded tip for an easier insertion through the head of the cable ties.
- ▶ Rounded edges for the safest application.
- ▶ Suitable for photovoltaic installations.

# HEAT RESISTANT CABLE TIES

These cable ties, made of polyamide 6.6 with special additives, can be used in environments where a resistance to high temperature is required (125°C continuous, 150°C for 500h). They are available in black and natural color; this last has an aquamarine color shade depending on the physical characteristics of the raw material.

## TECHNICAL DATA

Raw material:	polyamide 6.6.
Halogen-free	
Humidity absorption:	2,7% (50% relative humidity).
Working temperature:	-40°C ÷ 125°C.
Installation temperature:	-10°C ÷ 60°C.
Flammability rating:	UL 94 class V2.
Resistance to external agents:	excellent resistance to high temperatures. high resistance to aromatic solvents, oils, greases, oil derivatives, good resistance to bases, limited resistance to acids; not resistant to phenols and to chloride solvents.

## APPLICATIONS

- Automotive (engine compartment).
- Use at high temperature.
- Industrial wiring.

## BENEFITS

- Excellent resistance to high temperatures.
- Bent rounded tip for an easier insertion through the head of the cable ties.
- Rounded edges for the safest application.

## APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.

**HALOGEN FREE**

CABLE TIES // SPECIALS //

# SELF-EXTINGUISHING CABLE TIES

The self-extinguishing V0 cable ties, made of polyamide 6.6 with additives, can be used where the auto extinguishing performance is required. They conform with UL-94 V0 and GW 960°C standards and the halogen and phosphorus free material avoids toxic emission in event of fire.

## TECHNICAL DATA

Raw material:	polyamide 6.6 white.
Halogen-free	
Humidity absorption:	2,7% (50% relative humidity).
Working temperature:	-40°C ÷ 85°C.
Installation temperature:	-10°C ÷ 60°C.
Flammability rating:	UL 94 class V0.
Resistance to external agents:	high flammability resistance, excellent resistance to aromatic solvents, oils, greases, petroleum products, good resistance to bases, limited resistance to acids; not resistant to phenols and to chloride solvents.

## APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.  
UNI CEI 11170-3 certification relating to the assessment of the fire behaviour of the electrical components in rail vehicles.

## HALOGEN FREE

## APPLICATIONS

- Electrical applications in the rail industry and shipbuilding.
- Civil and industrial installations with higher risk in case of fire (cinema, theatre).

## BENEFITS

- Excellent flame resistance.
- Low smoke emission.
- Bent rounded tip for an easier insertion through the head of the cable ties.
- Rounded edges for the safest application.

CABLE TIES // SPECIALS //

# DETECTABLE CABLE TIES

BY METAL DETECTOR OR X-RAY

These cable ties are made with polyamide 6.6 added with iron oxide, providing magnetic properties throughout, allow identification by metal detector or X-ray inspection equipment to meet food, beverage and pharmaceutical safety standard on reducing product contaminations. The blue color allows an easier identification even with visual inspection. This allow the manufacturers of food and pharmaceutical companies to respect the FDA's Hazard Analysis and Critical Control Point (HACCP) systems standards by preventing any contamination.

## TECHNICAL DATA

Raw material:	polyamide 6.6 blue added with iron oxide.
Halogen-free	
Humidity absorption:	2,7% (50% relative humidity).
Working temperature:	-40°C ÷ 85°C.
Installation temperature:	-5°C ÷ 60°C.
Flammability rating:	UL 94 class HB.
Resistance to external agents:	high resistance to aromatic solvents, oils, greases, oil derivatives, good resistance to bases, limited resistance to acids; not resistant to phenols and to chloride solvents

## APPLICATIONS

- To fix wires in electrical equipment in food industries, pharmaceutical and wherever there is a risk of contamination by external agents (Directive HACCP).
- These cable ties are not suitable for food contact.

## BENEFITS

- Material easily detectable by metal detectors, X-rays and visually.
- Bent rounded tip for an easier insertion through the head of the cable ties.
- Rounded edges for the safest application.

## APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.

**HALOGEN FREE**

CABLE TIES // SPECIALS //

# COLOURED CABLE TIES

These cable ties are manufactured exclusively in Polyamide 6.6 to avoid problems with separation of material (e.g., metals) during recycling or interference with electronic equipment.

Enable to differentiate and identify power lines or circuits, or other applications where a different colour is required.

## TECHNICAL DATA

Raw material:	polyamide 6.6 added with coloured master.
Halogen-free.	
Humidity absorption:	2,7% (50% relative humidity).
Working temperature:	-40°C ÷ 85°C.
Installation temperature:	-10°C ÷ 60°C.
Flammability rating:	UL 94 class HB.

# COLSPEED CABLE TIES

Colspeed cable ties are produced in Polyamide 6.6. The flat head, the high surface and the closing system with external teeth of these cable ties, make them particularly suitable for applications on suspended lines, avoiding problems of insulation damage.

In the Colspeed cable ties the added carbon black gives an UV resistance higher than the natural ones.

## TECHNICAL DATA

Raw material:	polyamide 6.6.
Halogen-free:	
Humidity absorption:	2,7% (50% relative humidity).
Working temperature:	-40°C ÷ 85°C.
Installation temperature:	-10°C ÷ 60°C.
Flammability rating:	UL 94 class V2.
Resistance to external agents:	high resistance to aromatic solvents, oils, greases, oil derivatives, good resistance to bases, limited resistance to acids; not resistant to phenols and to chloride solvents.

## APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.

**HALOGEN FREE**

## APPLICATIONS

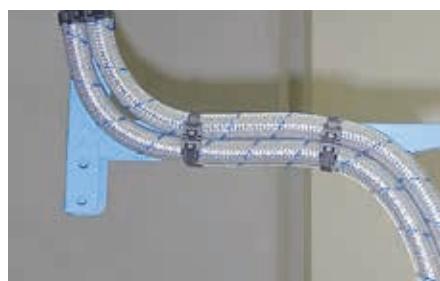

- Electrical installations.
- Industrial wiring.
- Automotive.
- Panel building.
- Special applications where a high resistance is required.

## BENEFITS

- Hard to release.
- Limited insertion effort.
- Rounded edges for the safest application.
- Bent rounded tip for an easier insertion.
- The cable ties can be closed by hand, without the dedicated tool.

INSTALLATIONS CABLE TIES //

# BELTURING PLUS CABLE TIES

Belturing Plus cable ties are produced in a special techno-polymer that gave them an extra UV resistance according to the norm CEI EN 62275 (ISO 4892-2, method A - 1000 hours simulating a condition equivalent to an exposition to solar radiance of at least 10 years in a region of South European Countries. Belturing Plus cable ties meet all the tests defined by the norm and maintain, after the test conditions, the 50% of the declared tensile strength (type 1 classification - point 6.2.1 of the standard). The flat head, the high surface and the closing system with external teeth of the cable ties make them particularly suitable for applications on suspended lines, avoiding problems of insulation damage. The particular closing system, which ensures a high resistance to reopening, makes necessary the application with a dedicated tool.

They are therefore recommended in outdoor applications for special climatic conditions and a prolonged UV exposure making them ideal for photovoltaic installations.

## TECHNICAL DATA

Raw material:	technopolimer.
Halogen-free.	
Humidity absorption:	<1%.
Working temperature:	-45°C ÷ 85°C.
Installation temperature:	-30°C ÷ 60°C.
Flammability rating:	UL 94 class HB.
Resistance to external agents:	excellent resistance to UV ray (DNV certificate). high resistance to aromatic solvents, oils, greases, oil derivatives, good resistance to bases, limited resistance to acids; not resistant to phenols and to chloride solvents.

## APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.

HALOGEN FREE

## APPLICATIONS

- ▶ Electrical installations.
- ▶ Photovoltaic installations.
- ▶ Industrial wiring.
- ▶ Heavy-duty applications.
- ▶ External applications.

## BENEFITS

- ▶ Highly withstands climatic changes, also in sea-areas.
- ▶ Excellent resistance to UV rays.
- ▶ Can be used in temporary position, which allows the re-opening.
- ▶ A very practical box that can easily be hung to your belt. Its convenient upper opening, very easy to be reclosed, allows the quickest picking-up of the product and the best protection from dust.

## INSTALLATION METHOD

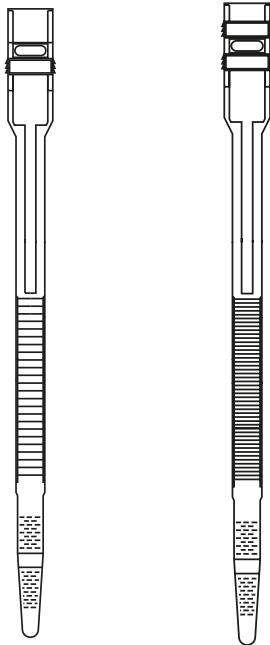

1. Temporary installation (releasable).
2. Definitive installation

STAINLESS STEEL CABLE TIES //

# COLSTEEL CABLE TIES

Colsteel cable ties are made in stainless steel 304 or 316 with ball lock system, for a quick installation and a low insertion effort. They are characterized by an high resistance to high temperature, to the flame and to corrosion.

Extremely UV-resistant, they are ideal for photovoltaic and solar thermal applications and in all areas exposed to the sun and external agents.

The AISI 316 stainless steel is recommended for use in aggressive environments where a very high corrosion resistance is required.

## TECHNICAL DATA

Raw material: stainless steel AISI 304 and 316

Halogen-free.

Humidity absorption:

Working temperature:

Not inflammable.

Resistance to external agents:

no sign.

-80°C ÷ 538°C.

excellent resistance to acids, oils, greases, chemicals, solvents, seawater and to corrosive atmosphere

excellent resistance to UV rays.

## APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.

**HALOGEN FREE** **INOX\***

<b>6728</b>	-	7,9x1.067	304	0,25	204,00	2.000	50	1.000

## APPLICATIONS

- ▶ Fixing of cables and pipes in the shipbuilding industry, offshore platforms, petrochemical plants, oil rigs, and environments with a risk of fire.
- ▶ Used as flame safety in electrical installations to fix the metal plates of identification (e.g. fire-fighting systems) which must be preserved in the event of fire.
- ▶ Installations where a high mechanical and UV resistance are required (photovoltaic).

## BENEFITS

- ▶ Grip by hand or with the dedicated tool.
- ▶ The ball lock system allows a little effort and save time during the installation.
- ▶ They can be put like fire assurance when other plastic cable ties are used (i.e. in the ship technological plants).
- ▶ They can be used like fire assurance when properties of superior strength are required.
- ▶ The absence of flashes and cutting edges avoid damages on the cable electrical insulation.

# WALL PLUG BASE

5458E

5459E

5456 AE - 5458 AE

Polyamide 6 support for cable ties up to 9 mm width.  
 Available in two heights, with or without lips, in black colour.  
 Fixing with hammer-in anchor.

## TECHNICAL DATA

Raw material:	polyamide 6.
Halogen-free:	
Humidity absorption:	3% (at 50% relative humidity).
Working temperature:	-10°C ÷ 65°C.
Min tightening temperature:	-5°C.
Flammability rating:	UL 94 class V2.
Resistance to external agents:	high resistance to aromatic solvents, oils, greases, oil derivatives, good resistance to bases, limited resistance to acids; not resistant to phenols and to chloride solvents.

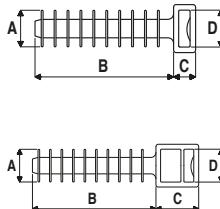

## APPROVALS/CERTIFICATIONS

Compliant with norm CEI EN 62275.

**HALOGEN FREE**

## APPLICATIONS

- Fixing of cables and pipes on solid materials (concrete, solid brick, etc.) in civil and industrial installations.
- For cable ties up to 9 mm width.

CABLE TIES ACCESSORIES // MOUNTING BASES FOR CABLE TIES //

# TWO WAYS MOUNTING BASES NEW

Two-ways mounting bases for the anchoring of wires to any smooth surface. Available in ABS white or black (std version), with or without adhesive, for any need of fixing, even in the most severe applications. Version with special material, UV resistant or detectable (metal detector or X-ray), it can be used in specific applications where special characteristics of the material are required (outdoor, sunny environment, food & pharma).

## TECHNICAL DATA STANDARD MOUNTING BASES

Raw material:	ABS.
Working temperature:	-10°C ÷ 60°C.
Flammability rating:	UL 94 class HB.

## TECHNICAL DATA UV RESISTANT MOUNTING BASES

Raw material:	polyamide 6.6
Working temperature:	-40°C ÷ 105°C.
Flammability rating:	UL 94 class V2.

## TECHNICAL DATA DETECTABLE MOUNTING BASES

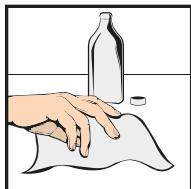

Raw material:	polyamide 6.6 blue added with iron oxide.
Working temperature:	-5°C ÷ 60°C.
Flammability rating:	UL 94 class HB.

## APPROVALS/CERTIFICATIONS

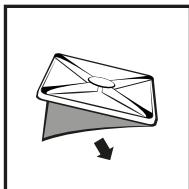

Compliant with norm CEI EN 62275.

## HALOGEN FREE

## INSTALLATION INSTRUCTION FOR SELF ADHESIVE MOUNTING BASES

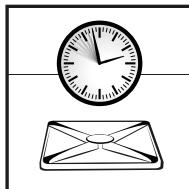

Clean the surface using an appropriate cleaner and wait until the surface is completely dried.

Peel off the protective film avoiding to touch the adhesive.

Put the base on the cleaned surface, pressing down with the finger for several seconds.

To assure the max adhesiveness to the surface, wait for the time indicated in the table technique.

## APPLICATIONS

- ▶ Fixing with screw or adhesive, for cable ties up to 3,6 or 4,8 mm width.
- ▶ Installation in outdoor (UV resistant) and indoor environments (standard), in food industries and pharmaceutical (detectable by metal detector or X-ray).
- ▶ **Without adhesive:** for applications with screw or other special adhesives.
- ▶ **With rubber base adhesive:** for applications where a good initial adhesiveness and an immediate use is required.
- ▶ **With acrylic base adhesive:** for applications where it needs a durable strength under severe conditions (high temperature, sun exposure). This product has lower initial tack compared to the one rubber base equipped, and you must wait at least a day for maximum adhesion, which will be maintained for a long time.

## BENEFITS

- ▶ Wide range of materials, dimensions, colours, adhesives.
- ▶ Slim profile for application on limited space.

## ADHESIVE CABLE CLAMPS FOR ROUND CABLES

Polyamide 6.6 adhesive cable clamps, black or white, to fix round cables to any kind of smooth surface. Available with two different kinds of adhesives for any needs. For technical characteristics of the adhesive and installation instructions, please see the chapter "two-ways bases".

NOTE

For a correct application of the adhesive bases, the surfaces must be thoroughly cleaned and degreased with solvent (alcohol or other cleaning product).

TECHNICAL DATA

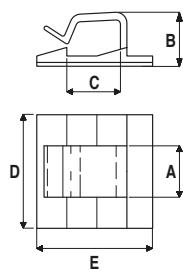

Raw material: polyamide 6.6.  
Working temperature: -40°C ÷ 85°C.  
Flammability rating: UL 94 class V2.

APPROVALS/CERTIFICATIONSAPPLICATIONS

- ▶ Fixing of round cables.
- ▶ With rubber base adhesive: for applications where a good initial adhesiveness and an immediate use is required.
- ▶ With acrylic base adhesive: for applications where it needs a durable strength under severe conditions (high temperature, sun exposure). This product has lower initial tack compared to the one rubber base equipped, and you must wait at least a day for maximum adhesion, which will be maintained for a long time.

# ADHESIVE CABLE CLAMPS FOR FLAT CABLES

Adhesive cable clamps in white PVC, to fix flat cables to any kind of smooth surface.  
For technical characteristics of the adhesive and installation instructions, please see the chapter "two-ways bases".

**NOTE**

For a correct application of the adhesive bases, the surfaces must be thoroughly cleaned and degreased with solvent (alcohol or other cleaning product).

**TECHNICAL DATA**

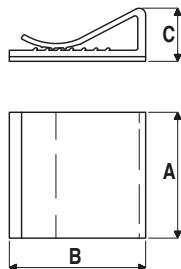

Raw material:	PVC.
Working temperature:	-10°C ÷ 70°C.
Flammability rating:	UL 94 class V0.

**APPLICATIONS**

- ▶ Fixing of flat cables.
- ▶ The rubber-base adhesive is suitable for applications where a good initial adhesiveness and an immediate use is required.
- ▶ For technical characteristics of the adhesive and installation instructions, please see the table below.

**BENEFITS**

- ▶ Excellent self-extinguishing characteristics.

## ACCESSORIES FOR FIXING //

# CRAMP WITH STEEL NAIL

High-density polyethylene cramp with high thermic resistance, with hardened and galvanized steel nail.

Ideal to fix electric cables on wall or wood. They are available for round or flat cables.

TECHNICAL DATA

Raw material:

high-density polyethylene with high thermic resistance.

Working temperature:

Nail in hardened and galvanized steel.

Flammability rating:

-40°C ÷ 100°C.

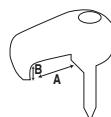

UL 94 class V2.

BENEFITS

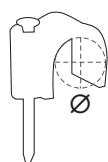

- Wide range of wire sizes (round, flat).
- Re-sealable and rigid packaging.

## DUCT RODS RANGE // IN POLYESTER //

# ELETWIST

Twisted polyester duct rod ø 4,5 mm, from 10 to 30 meters, with interchangeable threaded terminals.

High boost power, thanks to the absence of shape memory which maintains the rod straight during insertion in the cable ducts.

Excellent sliding within the conduits.

Pulling resistance (with terminals): 130 kg

**APPLICATIONS**

- Civil and tertiary installations.

**BENEFITS**

- Power and flexibility.
- Provided with a pulling grip to make easier the traction;
- interchangeable threaded terminals.
- Available with cage for an easy and fast rewind of the rod.

DUCT RODS RANGE // IN NYLON //

# NYLON DUCT RODS

TECHNICAL DATA

Nylon Perlon ø 4 mm duct rod, length up to 25 m, with interchangeable threaded terminals.

High flexibility.

Pulling resistance (with terminals): 115 kg.

APPLICATIONS

- Civil installations.

BENEFITS

- Efficiency and practical usage.
- Ideal for short duct section.
- interchangeable threaded terminals.

Lubrificant gel for cable passage

Code	Description	Nominal capacity (ml)	Pack pcs.
13520001	Lubrificant gel	500	1

Lubrificant gel, water base, for favouring the passage of wires and cables in the electrical conduits; it reduces of 80% the friction in inserting the wires on pipes and tubes. The innovative formula avoids the glue effect, typical of many other products. After its fast evaporation, there remains the lubricity for a long time.

Working and stocking temperature: -10° C ÷ 50°. Chemical inert and non-toxic.

**2-LOCK™**

# THE DIFFERENCE INSIDE

THE BEST PERFORMANCE WITH A CABLE TIE WITH **DOUBLE METAL TOOTH**.  
THE HIGHEST TENSILE STRENGTH AT THE LOWEST TEMPERATURES.

The innovative locking system with over-molded stainless steel cage grants superior mechanical performances than any other cable tie on the market; **2-LOCK™** combine the highest tensile resistance with the lowest effort of insertion, redefining new higher

performance standards. Mechanical excellence, easy to use, very low installation temperature, maximum reliability, innovative packaging, all that make **2-LOCK™** the new reference on the market for polyamide cable ties.

TERMINALS // PREINSULATED //

# PREINSULATED COPPER TERMINALS

The preinsulated copper terminals create a perfect base of contact for the insertion of the cables into blocks, using a limited space.

## TECHNICAL DATA

Connector material:	electrolytic tinned copper (purity grade 99,9%).
Insulation material:	polypropylene.
Halogen-free:	Self-extinguishing UL94 V2
Working temperature:	-10°C ÷ 105°C.
Installation temperature:	0°C ÷ 60°C.
Max admissible point:	120°C for short periods.
Resistance to external agents:	good resistance to bases and weak acids. Limited resistance to strong oxidant acids, oils and minerals. No resistance to chloride solvents.

## APPROVALS/CERTIFICATIONS

According, for colour and dimension, to the norm DIN 46228/4.  
Certification CSA nr. 250148.

# INSULATED TERMINALS ASSORTMENT IN BOX

Insulated terminals assortment in box, in many dimensions and colours.  
Box dimensions: diameter = 90mm; h = 45mm.

## APPROVALS/CERTIFICATIONS

According, for colour and dimension, to the norm DIN 46228/4.  
Certification CSA nr. 250148.

## APPLICATIONS

- Electrical wiring and connections in electric and electronics switchboards.

## BENEFITS

- The assortment of different sizes and colours allows you to find the suitable terminal for the wished installation.
- The practical box in PVC is provided with separations for the easiest choice of the wished product.

# INSULATED CRIMPING TERMINALS

The insulated terminals are obtained by plates of copper undergoing a process of hot treatment and electrolytic tin plating. This process optimizes the maximum malleability of the material providing the easiest compression during the crimping operations.  
Available with nylon insulation (Easy Entry system) e in PVC (anti-vibration sleeve).

## TECHNICAL DATA

Connector material:

electrolytic tinned copper (purity grade 99,9%) obtained by plates of copper, undergoing a process of hot-treatment and of electrolytic tin plating.

Insulation material:

nylon (EASY ENTRY) for rings, forks, pins and end connectors.

Working temperature:

PVC for butt connectors and piggy-backs

Self-extinguishing UL94 V2

nylon: up to 105°C.

Halogen-free.

PVC: up to 75°C.

## APPLICATIONS

- The insulated crimping terminals are used for electrical connections.

## BENEFITS

- The particular internal shape of the insulation (Easy Entry) enables the quickest and safest insertion of the cables.
- The internal anti-vibration sleeve (PVC insulation) avoids the tear as well as the unthreading of the cable even in presence of particular vibrations.

## APPROVALS/CERTIFICATIONS

Certifications: UL file n° E344191 and E344188.

# HEAT SHRINKABLE BUTT CONNECTOR

The butt connectors are made of a tinned copper tube covered by a heat shrinkable tube with a special adhesive inside. The polymer used for the insulation is suitable to be crimped with the dedicated tool.

## TECHNICAL DATA

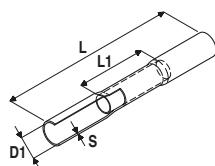

Connector material:	electrolytic tinned copper (purity grade 99,9%).
Insulation material:	cross-linked polyolefin.
Shrinking temperature:	100°C
Working temperature:	-55°C ÷ 125°C.
Dielectric strength:	30 kV/mm.

## APPLICATIONS

- The butt connectors are covered by a heat shrinkable tube with a special adhesive inside granting a perfect "sealing".

## BENEFITS

- The internal adhesive insulation provides an effective sealing of the electrical connection.

## LINKED PRODUCTS:

Tools for terminals, pages 82

TERMINALS // COPPER LUGS //

# COPPER LUGS

The copper lugs are obtained from pure electrolytic copper tube (99,9%) with high conductivity; they are provided with an hole for the inspection of the conductor. Every lug is marked with the section of the wire and with the screw diameter.

## TECHNICAL DATA

Connector material: electrolytic tinned copper (purity grade 99,9%).  
Tin coating thickness: 4µm.

## APPROVALS/CERTIFICATIONS

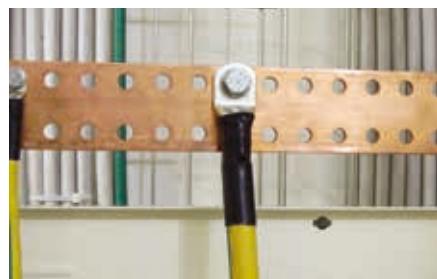

According to the norm: IEC 1238-1:1993.

## APPLICATIONS

- ▶ Electrical wiring in electric and electronics switchboards.

## BENEFITS

- ▶ The hot treatment grants the best crimping operation.
- ▶ The particular countersinking grants the easiest insertion of the wire.
- ▶ The process of electrolytic tin plating ensures the best protection against oxidation.

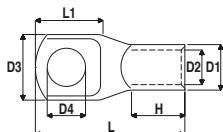

## LINKED PRODUCTS:

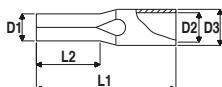

Tools for copper lugs, see pages 88

# HOW TO CHOOSE THE RIGHT HEAT-SHRINKABLE TUBING

## TECHNICAL CHARACTERISTICS

CABLE PROTECTION	PRODUCT	SHRINKING RATIO	OPERATING TEMPERATURE (C°)	SHRINKING TEMPERATURE (C°)	FLAME RATING (C°)	Ø AVAILABLE (mm)	CHARACTERISTICS	COLOURS	PACKAGING	PAGE
THIN WALL	EV 100	2:1	-30°C÷105°C	>90°C	-	1,6÷50,8	General purpose economic	Black	Reel Box 1 mtr length	58
	ET 100	2:1	-55°C÷135°C	>90°C	UL 224	1,2÷101,6	General purpose	Black colours	Reel Box 1 mtr length	60
	EL 100	2:1	-55°C÷135°C	>90°C	UL 224 VW1	1,6÷101,6	Professional purpose	Black	Reel Box	62
	ET 301	3:1	-55°C÷135°C	>100°C	UL 224	1,5÷39	General purpose high shrinking ratio	Black	Reel Box 1 mtr length	64
DUAL WALL THIN ADHESIVE-LINED	EL 301A	3:1	-55°C÷110°C	>100°C	UL 224 (external wall)	3÷24	Professional purpose adhesive-lined	Black	Box 1 mtr length	68
	EL 401A	4:1	-55°C÷110°C	>100°C	UL 224 (external wall)	4÷52	Professional purpose adhesive-lined high shrinking ratio	Black	1 mtr length	69
MEDIUM WALL WITH ADHESIVE	EM 100A	3:1	-40°C÷120°C	>110°C	-	12÷180	Heavy applications adhesive-lined	Black	1 mtr bag	70

In order to choose the right heat shrinkable tubing size, it is necessary that the diameter of the shrinked tubing allows the perfect adhesion between the tubing and the cable diameter that has to be covered. This result is achieved when the tubing shrinks between 20% and 80% of its complete shrinkage capacity.  
Herewith some examples:

#### EXAMPLE 1

Image to have a **cable of 10 mm** diameter to be wrapped with a heat shrinkable tubing with a shrinking ratio of **3:1**; in theory both sizes 12/4 and 24/8 would be suitable, since the required diameter of 10 mm lies within the shrinking range of both tubing sizes.

Type	Ø Nominal (mm)		Shrinkage capacity (mm)	Shrinking	
	max expanded	min recovered		min (20%)	max (80%)
12/4	12	4	8	10,4	5,6
24/8	24	8	16	20,8	11,2

**the right heat shrinkable tubing is 12/4.**

#### EXAMPLE 2

Image to have a **cable of 5 mm** diameter to be wrapped with a heat shrinkable tubing with a shrinking ratio of **2:1**; in theory both sizes 6,4/3,2 and 9,5/4,7 would be suitable, since the required diameter of 5 mm lies within the shrinking range of both tubing sizes.

Type	Ø Nominal (mm)		Shrinkage capacity (mm)	Shrinking	
	max expanded	min recovered		min (20%)	max (80%)
6,4/3,2	6,4	3,2	3,2	5,76	3,84
9,5/4,7	9,5	4,7	4,7	8,56	5,74

**the right heat shrinkable tubing is 6,4/3,2.**

#### COMPLETE EXAMPLE - THIN AND DUAL WALL TUBING

# EV 100

EV 100 is a thin wall heat shrinkable tubing in cross-linked polyolefin, economic, suitable for electrical insulation and general applications where a low shrinking temperature is required.

Available in reel, dispenser box, 1 mtr. length.

## TECHNICAL DATA

Shrinking ratio:	2: 1.
Diameters available:	from Ø 1,6 mm to Ø 50,8 mm.
Colours available:	black.
Working temperature:	-30°C ÷ 105°C.
Shrinking temperature:	> 90°C.
Flammability rating:	not self-extinguishing.
Longitudinal change:	+5%; -10%.
Dielectric strength:	> 20 kV/mm.

## NOTE

For availability, minimum order quantities and lead time of products on request, please ask to our sales department.

## APPROVALS/CERTIFICATIONS

FMVSS 302

**HALOGEN FREE**

## APPLICATIONS

- ▶ Insulation, protection and identification cables and joints.

## BENEFITS

- ▶ Halogen-free.

# EL 100

EL 100 is a flexible, self-extinguishing thin wall heat shrinkable tubing in cross-linked polyolefin, suitable for professional applications in electrical and electronics sectors, in particular for cable insulating, marking, and identification. EL 100 ensures an excellent flame resistance.

Available on reel and box dispenser.

## TECHNICAL DATA

Shrinking ratio:	2: 1.
Diameters available:	from Ø 1,6 mm to Ø 101,6 mm.
Colours available:	black.
Working temperature:	-55°C ÷ 135°C.
Shrinking temperature:	> 90°C.
Flammability rating:	self-extinguishing UL 224 - VW1.
Longitudinal change:	-5%; +5%.
Dielectric strength:	> 20 kV/mm.

## NOTE

For availability, minimum order quantities and lead time of products on request, please ask to our sales department.

## APPROVALS/CERTIFICATIONS

SAE-AMS-DTL-23053/5 class 3 ( $\varnothing \leq 50,8$ )  
UL 224 125°C VW1- UL cert. E 228117  
CSA C22.22 N.198.1-98 OFT.

## APPLICATIONS

- ▶ Insulation, protection and identification cables and joints.

## BENEFITS

- ▶ High self-extinguishing.

HEAT SHRINKABLE TUBING // THIN WALL //

# ET 301

ET 301 is a thin wall heat shrinkable tubing in cross-linked polyolefin, self-extinguishing, flexible and strong, with chemical resistance and good capacity of electrical insulation, suitable for general applications.

Thanks to its high shrinking ratio, more applications can be covered with the same diameter. Its high expansion ratio is designed for use when wide ranging substrate diameters need to be covered.

Available in reel, dispenser box, 1 mtr. length.

## TECHNICAL DATA

Shrinking ratio:	3: 1.
Diameters available:	from Ø 1,5 mm to Ø 39 mm.
Colours available:	black.
Working temperature:	-55°C ÷ 135°C.
Shrinking temperature:	> 90°C.
Flammability rating:	self-extinguishing UL 224.
Longitudinal change:	+1%; -10%.
Dielectric strength:	> 20 kV/mm.

## NOTE

For availability, minimum order quantities and lead time of products on request, please ask to our sales department.

## APPROVALS/CERTIFICATIONS

SAE-AMS-DTL-23053/5  
class 1  
UL224 125°C - UL cert. E 228117  
CSA C22.2 N.198.1-98 OFT

## APPLICATIONS

- ▶ Insulation, protection and identification cables and joints.

## BENEFITS

- ▶ High shrinking ratio.
- ▶ Self-extinguishing.

HEAT SHRINKABLE TUBING // THIN WALL ADHESIVE-LINED //

# EL 301A WITH ADHESIVE

EL 301A is a flexible, heat shrinkable tubing in cross-linked polyolefin, with thermoplastic adhesive inside suitable for professional applications, such as insulation, identification and protection of wires and cables, in electric and electronic components.

Its high shrinking ratio and its inner liner allow to seal and encapsulate the inner components, covering sections of different dimensions.

Available in dispenser box, 1 mtr. length (reel on request).

## TECHNICAL DATA

Shrinking ratio:	3: 1.
Diameters available:	from Ø 3 mm to Ø 24 mm.
Colours available:	black.
Working temperature:	-55°C ÷ 110°C.
Shrinking temperature:	> 100°C.
Flammability rating:	self-extinguishing (external wall).
Longitudinal change:	+1%; -15%.
Dielectric strength:	> 20 kV/mm.

## NOTE

For availability, minimum order quantities and lead time of products on request, please ask to our sales department.

## APPROVALS/CERTIFICATIONS

HEAT SHRINKABLE TUBING // MEDIUM WALL ADHESIVE TUBING //

# EM 100A WITH ADHESIVE

EM 100A is a medium wall heat shrinkable tubing in cross-linked polyolefin, with internal thermoplastic adhesive, suitable for a wide range of applications, such as insulating and protecting cable joints and terminations.

The inner liner provides good moisture sealing and weathering protection.

Good strain and abrasion resistance.

Available in plastic bag 1 mtr. length.

## TECHNICAL DATA

Shrinking ratio:	3:1.
Diameters available:	from Ø 12 mm to Ø 180 mm.
Colours available:	black.
Working temperature:	-40°C ÷ 120°C.
Shrinking temperature:	> 110°C.
Flammability rating:	not self-extinguishing.
Longitudinal change:	-10%.
Dielectric strength:	> 17 kV/mm.

## NOTE

For availability, minimum order quantities and lead time of products on request, please ask to our sales department.

NEOPRENE SLEEVES //

# NEOPRENE SLEEVES

Sleeves in lubricated neoprene suitable for protecting and insulating electrical panels and industrial wirings.

## TECHNICAL DATA

Type of material:	black lubricated neoprene.
Diameters available:	from Ø 1,25 mm to Ø 17 mm.
Working temperature:	-30°C ÷ 90°C.
Flammability rating:	UL 94 class V0.
Dielectric strength:	13 kV/mm

## APPLICATIONS

- ▶ Protecting and insulating electrical panels.

## BENEFITS

- ▶ The sleeves are internally lubricated for an easy and quick application with the dedicated tools.
- ▶ Resistance to oils and solvents.
- ▶ Good resistance to humidity and aging.
- ▶ Resistant to low temperatures.

# PVC TUBING SLEEVES

Tubing sleeve in PVC is suitable for mechanical protection, insulating cables in the electrical applications. The material is resistant to ozone, aging and weak acids.

Available in reel from 25 mt up to 500 mt long, 0,3mm up to 1,3 mm thickness. High temperature resistance (120°C) on request.

## TECHNICAL DATA

Raw material:	PVC.
Diameters available:	from Ø 3 to Ø 50 mm.
Colours available:	black.
Working temperature:	-40°C ÷ 70°C.
Flammability rating:	UL 94 class V1.
Dielectric strength:	25 kV/mm.

## NOTE

For availability, minimum order quantities and lead time of products on request, please ask to our sales department.

SPIRALS //

# POLYETHYLENE SPIRALS

The low density polyethylene spiral is extremely flexible and it is ideal for bundle and protect the electrical cable and wire. Available in two colours, good resistance to acid and basic environment. packed in plastic bag

## TECHNICAL DATA

Type of material: Extruded Polyethylene LD (low density).  
 Colours available: natural and black.  
 Dim. available: for bundle of cables from Ø 3 to Ø 150 mm.  
 Working temperature: -50°C ÷ 85°C.  
 Flammability rating: UL 94 class HB.  
 Halogene-free.

## NOTE

For availability, minimum order quantities and lead time of products on request, please ask to our sales department.

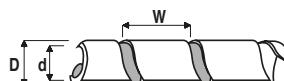

**HALOGEN FREE**

## APPLICATIONS

- Bundling and protection of electrical cables.

## BENEFITS

- The spiral is obtained by a tube of extruded and cut polyethylene.
- Extremely flexible.
- Quick installation also in definitive wiring.
- Due to the spiral structure, cables can branch out at any point and in any direction.

BRAIDED SLEEVES //

# BRAIDED SLEEVES

The braided sleeve is available in polyester or in polyamide 6.6 according to the type of application required. It is suitable for mechanical protection and cable bundling. The material is resistant to abrasion and chemical agents and it is recommended for applications where an high flame resistance and low smoke toxicity is required (e.g. railway use). Available in reel.

Available in reel.

## TECHNICAL DATA - POLYESTER

Raw material:	polyester.
Yarn diameter:	0,22 mm.
Working temperature:	-40°C ÷ 150°C.
Colours available:	grey - black.
Diameters available:	from 6 to 40 mm.
Flammability rating:	UL 94 class V2.
Halogene-free:	

## TECHNICAL DATA - POLYAMIDE 6.6

Raw material:	polyamide 6.6.
Yarn diameter:	0,25 mm.
Working temperature:	-40°C ÷ 125°C.
Colours available:	grey - black.
Diameters available:	from 6 to 40 mm.
Flammability rating:	UL 94 class V2.
Halogene-free:	

## APPROVALS/CERTIFICATIONS

FMVSS 302, DIN 5510-2 (polyester, polyamide 6.6)  
NF F 16-101 (polyamide 6.6)  
EN 45545-2 (HL3)

**HALOGEN FREE**

## APPLICATIONS

- ▶ Flexible cable protection in the electrical or electronic installations, and in the telecommunications.
- ▶ Extreme easy insertion and slip of a cables bundle.

## BENEFITS

- ▶ Extreme easy insertion and slip of a cables bundle.
- ▶ The braided sleeve can be cut with a heat cutter, to prevent fraying at the end of the yarn.

# INSULATION TAPES IN PVC

The PVC insulation tapes are available in different thicknesses, lengths and colours; the material is self-extinguishing and with a high degree of electrical insulation and mechanical protection for any applications in civil and industrial installations.

The characteristics of the adhesive and the PVC support ensure a high insulating power (600 V) and they can be used even in critical conditions (low temperatures, high mechanical stress).

## TECHNICAL DATA

Type of support:	PVC film with adhesive
Nominal thickness:	0,13 mm - 0,15 mm - 0,18 mm.
Adhesion to steel:	2,5 N/cm.
Adhesion to backing:	2,2 N/cm.
Breaking strength:	25 N/cm (0,13) - 27 N/cm (0,15) - 30 N/cm (0,18).
Elongation at break	200% (0,13) - 200% (0,15) - 250% (0,18).
Dielectric strength:	40 kV/mm.
Working temperature:	-18 ÷ 90°C.
Flammability rating:	self-extinguishing.

## APPROVALS/CERTIFICATIONS

PVC tapes: CEI EN 60454-3-1 e BS 3924  
Homologation VDE nr. 40039640

## APPLICATIONS

- ▶ Electrical installations.
- ▶ Insulation and cable marking.
- ▶ Automotive.
- ▶ Identification.

## BENEFITS

- ▶ Easy application.
- ▶ High electrical insulation.
- ▶ High resistance to abrasion.
- ▶ Good resistance to acids, bases and weather.

# SELF-AMALGAMATING INSULATION TAPES

The self-amalgamating tapes in EPR allow you to create a mechanical and electrical protection providing a high waterproofing power.

## TECHNICAL DATA

Type of support:	ethylene-propylene rubber (EPR)
Nominal thickness:	0,75 mm.
Adhesion to steel:	4 N/cm.
Breaking strength:	20 N/cm.
Elongation at break:	620%.
Dielectric strength:	32 kV/mm.
Working temperature:	-40 ÷ 90°C.
Flammability rating:	self-extinguishing.

## APPLICATION

Remove the protective film and stretching the tape to reduce its width by one third. Wrap the section to be covered by overlapping each subsequent layer of 50%. End the application by pulling the tape and join the end part of the tape to the section covered. It is recommended to cover the connection with PVC adhesive tape.

## APPLICATIONS

- ▶ Insulation, waterproofing and protection of electrical components.
- ▶ For jointing and repairing a wide range of solid dielectric power cables up to 69 KV.
- ▶ Compatible with a wide range of rubber and plastic dielectric cable insulation, polyethylene, pvc, butyl and neoprene.

## BENEFITS

- ▶ Excellent physical and electrical properties with a high degree of stability under condition of humidity.
- ▶ The tape amalgamates rapidly when applied under tension to provide a void-free homogeneous wrapping, without the need for external heat or pressure.
- ▶ Excellent resistance to water and ozone.

## CRIMPING TOOLS - EZ CRIMP //

**EZ CRIMP**

Professional crimping tool

ELEMATIC EZ CRIMP® (EASY CRIMP) is a patented, extremely robust and reliable crimping tool, realized in micro casted C45 steel (matt chromo plated tool frame) with ergonomic handles made of antislip plastic material. It is the ideal tool for all applications in switchboards and in all industrial installations.

## TOOLS FOR WIRE-TERMINALS //

9102

Crimping tool with plastic handles and spring for re-opening. Suitable for ferrules from 0,5 to 2,5 mm<sup>2</sup>. (AWG 20 ÷ 14)

Code	Section (mm <sup>2</sup> )	L (mm)	H (mm)	Weight (gr)	Pack pcs.
9102	0,5÷2,5	145	60	160	1

## TOOLS FOR WIRE-TERMINALS //

9004

Crimping tool with plastic handles and spring for re-opening. Suitable for ferrules from 0,75 to 10 mm<sup>2</sup>. (AWG 18 ÷ 8)

Code	Section (mm <sup>2</sup> )	L (mm)	H (mm)	Weight (gr)	Pack pcs.
9004	0,75 ÷ 10	180	80	320	1

## TOOLS FOR WIRE-TERMINALS //

9039A

Professional crimping tool in steel plate with micro casted steel dies, lateral crimping and plastic handles, dies locking regulation device. Rachet closing system for handles and automatic unclamping at complete execution of the crimping operation. Suitable for ferrules from 0,5 to 6 mm<sup>2</sup> (AWG 22÷10).

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
9039A	0,5 ÷ 6	206	390	1

## TOOLS FOR WIRE-TERMINALS //

9039

Professional crimping tool in steel plate with micro casted steel dies, lateral crimping and plastic handles, dies locking regulation device. Rachet closing system for handles and automatic unclamping at complete execution of the crimping operation. Suitable for ferrules from 6 to 16 mm<sup>2</sup> (AWG 10 ÷ 6).

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
9039	6 ÷ 16	205	380	1

## TOOLS FOR WIRE-TERMINALS //

9302

Professional metal crimping tool, with burnished finishing, square crimp and lateral loading of the connector. Provided with ergonomic, two-component handles. Equipped with safety device and mechanical unlocking release, for an optimum crimping.

Suitable for ferrules from 0,08 to 10 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
9302	0,08 ÷ 10	180	392	1

## TOOLS FOR WIRE-TERMINALS //

## 9304

Professional metal crimping tool, with burnished finishing, square crimp and frontal loading of the connector.

Equipped with safety device and mechanical unlocking release, for an optimum crimping. Two-component ergonomic handles.

For convenient handling in areas difficult to be reach with preselection of two different crimping ranges.

It is suitable for ferrules from 0,08 to 16 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
9304	0,08 ÷ 16	190	475	1

## TOOLS FOR WIRE-TERMINALS //

## 9410

Tool for crimping end-sleeve terminals in strips

Ergonomic and automatic tool for end-sleeve terminals in strips from 0,5 up to 2,5 mm<sup>2</sup>. Equipped with 3 sleeve magazines and a metallic box. It grants an easy and quick change. Multi functional tool for flexible cable cutting stripping, twisting and all crimping operations.

Code	Description	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
9410	Kit box for end-sleeve terminals in strips (tool + 3 magazines + box).	0,5-0,75-1,0-1,5-2,5	180	220	1

**TOOLS FOR PREINSULATED TERMINALS //**

# 9007

Tool with steel frame, micro casted dies and plastic handles. Equipped with safety device, ratchet for the perfect closing of the handles and automatic unclamping when the crimping operation is completed. Suitable for preinsulated terminals from 0,5 to 6 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
<b>9007</b>	0,5 ÷ 6	220	500	1

**TOOLS FOR PREINSULATED TERMINALS //**

# 9020

Tool with steel frame and plastic handles. Suitable for open barrel terminals from 0,5 to 6 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
<b>9020</b>	0,5 ÷ 6	185	210	1

**TOOLS FOR PREINSULATED TERMINALS //**

# 9049

Tool with steel frame, micro casted dies and plastic handles. Equipped with safety device, ratchet for the perfect closing of the handles and automatic unclamping when the crimping operation is completed. Suitable for open barrel terminals from 0,5 to 6 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
<b>9049</b>	0,5 ÷ 6	225	510	1

## TOOLS FOR COPPER LUGS //

9048

Crimping tool with fusion head, handles in reinforced metal, plastic handles. Equipped with ratchet for the perfect closing of the handles and automatic unclamping at complete execution of the crimping operation.

Suitable for crimping copper lugs through manual pressure, from 1,5 to 16 mm<sup>2</sup>.

## TOOLS FOR COPPER LUGS //

9038

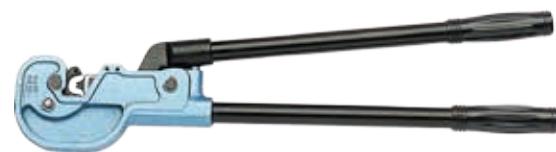

Tool with frame and dies made of micro casted steel, handles of pressed steel.  
Suitable for crimping copper lugs through manual pressure, from 10 to 95 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
9038	10 ÷ 95	570	3.100	1

**TOOLS FOR COPPER LUGS //**

# 9068 9069 9071

Crimping tool with fusion head, handles in reinforced metal, plastic handles and micro casted steel dies.

Suitable for crimping copper lugs through manual pressure, up to 120 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	H (mm)	Weight (gr)	Pack pcs.
<b>9068</b>	25÷120	660	120	4.500	1
<b>9069</b>	16÷95	655	120	4.400	1
<b>9071</b>	10÷50	570	100	3.280	1

**TOOLS FOR COPPER LUGS //**

# 9075

Tool with zinc-plated steel frame, handles in reinforced metal with anti slip plastic material, die with hexagonal crimping.

Suitable for hexagonal crimping of copper lugs through manual pressure, from 6 to 120 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
<b>9075</b>	6 ÷ 120	650	290	1

**AUTOMATIC STRIPPING TOOLS //**

# 9305

Automatic self-adjusting insulation stripper

Automatic stripping tool with body made of glass fibre reinforced plastic and ergonomic, two-component handles. Automatic adjustment for an optimal stripping.

Metal clamping jaws. It is suitable for cables from 0,03 to 10 mm<sup>2</sup>.

Device for stripping cables with adjustable stop from 5 to 20 mm.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
<b>9305</b>	0,03 ÷ 10	195	200	1

**AUTOMATIC STRIPPING TOOLS //**

# 5415

Automatic stripping and cutting tool

Automatic stripping and cutting tool with body made of plastic material, blades in zinc-plated steel.  
Suitable for cables from 0,5 to 4 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	H (mm)	Weight (gr)	Pack pcs.
<b>5415</b>	0,5÷4	170	100,5	138	1

**AUTOMATIC STRIPPING TOOLS //**

# 9056

Automatic stripping tool

Automatic stripping tool with blades in steel.  
Suitable for cables from 0,5 to 6 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	H (mm)	Weight (gr)	Pack pcs.
<b>9056</b>	0,5÷6	170	120,5	338	1

**AUTOMATIC STRIPPING TOOLS //**

# 9012

Stripping, cutting and crimping tool

Stripping, cutting and crimping tool for insulated terminals with body in metal and plastic handles, provided with spring for the re-opening.

Suitable for cables from 1 to 6 mm<sup>2</sup>.

Code	Section (mm <sup>2</sup> )	L (mm)	Weight (gr)	Pack pcs.
<b>9012</b>	1÷6	130	130	1

**TOOLS FOR CRIMPING MODULAR PLUGS //**

# 11909001

Tool with system of cable stripping and cutting.

Suitable for crimping modular plugs with 6-8 poles (RJ11, RJ12, RJ45).

Code	Connector	L (mm)	H (mm)	Weight (gr)	Pack
	type N				
11909001	6P6K; 8P8K	200	65	320	1

**TOOLS FOR NEOPRENE SLEEVES //**

# TOOL FOR NEOPRENE SLEEVES

Special tool for the installation of sleeves, with uniform expansion.

Available in four versions in accordance with the dimension of the sleeve.

Code	Sleeves Ø internal [mm]	Sleeves Name	Pack
			pcs.
5414	1,25÷2,4	A0÷A1 BIS	1
5416	1,75÷5	A1÷A3	1
5417	3÷10	A2÷A5	1
5418	10÷17	A5÷A10	1

**CABLE STRIPPERS //**

# 9058

Cable stripper with screw, for round cable, body in plastic material, parts in chrome-plated metal.

Adjustable blade in tempered steel.

Suitable for cables Ø 4-28 mm.

Code	Ø Cable (mm)	L (mm)	Weight (gr)	Pack
9058	4÷28	135	71	1

## CABLE STRIPPERS //

9061

Cable stripper for round cable, body in plastic material, parts in chrome-plated metal.

Adjustable tempered steel blade. Knife with straight chrome-plated steel blade.

Suitable for cables ø 8-28 mm.

Code	Ø Cable (mm)	L (mm)	Weight (gr)	Pack pcs.
9061	8-28	180	90	1

## CABLE STRIPPERS //

9062

Cable stripper for round cable, body in plastic material, parts in chrome-plated metal.

Adjustable blade in tempered steel. Hook cutter in passivated steel.

Suitable for cables ø 8-28 mm.

Code	Ø Cable (mm)	L (mm)	Weight (gr)	Pack pcs.
9062	8-28	180	90	1

## CABLE CUTTERS //

9032

Cable cutter for cables in copper and aluminum with ø max 15 mm (~50 mm<sup>2</sup>).

Realized in chrome tempered steel with precision hardened blades.

Code	Ø Cable (mm)	L (mm)	Weight (gr)	Pack pcs.
9032	15 max	170	210	1

**CABLE CUTTERS //**

# 9033

Cable cutter for cables in copper and aluminum with Ø max 25 mm (~150 mm<sup>2</sup>). Realized in chrome tempered steel with precision hardened blades.

Code	Ø Cable (mm)	L (mm)	Weight (gr)	Pack pcs.
9033	25 max	200	300	1

**CABLE CUTTERS //**

# 9051

Cable cutter with metal fusion handles and cutting blades in treated steel, with plastic handles. Suitable for cutting cables in copper and aluminium with section up to 250 mm<sup>2</sup>.

Code	Cable section (mm <sup>2</sup> )	L (mm)	H (mm)	Weight (gr)	Pack pcs.
9051	250 max	600	140	1.540	1

**CABLE CUTTERS //**

# 9052

Cable cutter with metal fusion handles and cutting blades in treated steel, with plastic handles. Suitable for cutting cables in copper and aluminium with section up to 500 mm<sup>2</sup>.

Code	Cable section (mm <sup>2</sup> )	L (mm)	H (mm)	Weight (gr)	Pack pcs.
9052	500 max	800	165	2.880	1

**CABLE CUTTERS //**

# 9054

Cable cutter with painted metal handles and ratchet device to advance the treated steel cutting blades, with plastic handles. Suitable for cutting cables in copper and aluminium with section up to 300 mm<sup>2</sup>.

Code	Cable section (mm <sup>2</sup> )	L (mm)	H (mm)	Weight (gr)	Pack pcs.
9054	300 max	250	125	680	1

**PIPES CUTTERS //**

# 9089-9090

Tool for cutting rigid and semi-rigid PVC pipes

Suitable for cutting rigid or semi-rigid PVC pipes with section from 25 up to 40 mm.

Code	Ø Pipe (mm)	L (mm)	H (mm)	Weight (gr)	Pack pcs.
<b>9089</b>	20 max	190,5	70	272	1
<b>9090</b>	40 max	210,5	95	358	1

**TOOLS FOR BRAIDED SLEEVES //**

# 9050

Heat cutter for braided sleeves

Heat cutter for braided sleeves and synthetic materials (belts and ropes).

Recommended for short-time operation (12 seconds work, 48 seconds pause), it heats up in 6-8 seconds the operation temperature (600°C).

It is equipped with interchangeable blades (not included), to be cleaned with a brass brush.

**HEAT CUTTER FOR BRAIDED SLEEVES\***

Code	Power max (W)	Rated voltage (V)	Weight (gr)	Pack pcs.
<b>9050</b>	70	110-230	1.000	1

\*Without blade, to choose among the accessories.

**ACCESSORIES**

<b>9050 L2</b>	Large blade for heat cutter	45	1

**HOT GUNS //****12200013**

Hot air gun

Hot air gun with 2 position selector.  
 Position 1: power 1000W, air temperature 375°C, air flow 200 l/min.  
 Position 2: power 1500W, air temperature 495°C, air flow 400 l/min.

Code	Power max (W)	Rated voltage (V)	L (mm)	Weight (gr)	Pack pcs.
<b>12200013</b>	1.500	230	240	670	1

**HOT GUNS //****12200016**

Hot air gun

Steinel hot air gun with 2-speed selector, micanite resistance and ergonomic grip.  
 Position 1: power 800W, air temperature 300°C, air flow 240 l/min.  
 Position 2: power 1600W, air temperature 500°C, air flow 450 l/min.

Code	Power max (W)	Rated voltage (V)	L (mm)	Weight (gr)	Pack pcs.
<b>12200016</b>	1.600	230-240	252	671	1

**HOT GUNS //**

**12200019**

Hot air gun

Steinel hot air gun with 3-speed selector and electronic temperature control by potentiometer. Ceramic resistance and ergonomic grip.

Position 1: air flow 150 l/min.

Position 2: air flow 300 l/min.

Position 3: air flow 500 l/min.

Temperature: from 80 °C to 600 °C according to the setting.

Power max: 2000W.

Code	Power max (W)	Rated voltage (V)	L (mm)	Weight (gr)	Pack pcs.
<b>12200019</b>	2.000	230-240	253	840	1

**HOT GUNS //**

**12200021**

Hot air gun

Steinel hot air gun with 2-speed selector and electronic temperature control switch [9 positions]. Ceramic resistance, ergonomic grip and integrated fine dust filter.

Position 1: air flow 150 l/min.

Position 2: air flow 500 l/min.

Temperature: from 80 °C to 630 °C according to the setting.

Max power: 2200W.

Code	Power max (W)	Rated voltage (V)	L (mm)	Weight (gr)	Pack pcs.
<b>12200021</b>	2.200	230-240	337	920	1

# REFLECTING NOZZLES

Reflector nozzle for channelling the hot air flow and speeding up the thermo shrinking process.

Width 31,2 mm.

Suitable for hot air guns cod. 12200013 - 12200016 - 12200019 - 12200021.

Code	Description	L (mm)	Pack pcs.
12200033	Reflector nozzle	31,2	1

HOT GUNS //

## 12200011

Multifunctional gas tool

HAND TOOLS

Burner

Hot gun

Soldering iron

Recommended for short time operation, not for continuous use. Turn off the flame after the use.

Capacity butane gas: 7 ml

Medium autonomy: 30 min, depending on the setting.

Max flame temperature: 1300 °C.

Weight: 60 gr.

For safety reasons, the product is provided without gas.

Code	Gas (ml)	Autonomy (min)	L (mm)	Weight (gr)	Pack pcs.
